Bangladesh

## PROFESSIONAL SUMMARY

MERN stack web developer skilled in building fast, scalable, and user-friendly applications using React.js, Next.js, Node.js, Express.js, and MongoDB. Experienced with Firebase Authentication, REST APIs, responsive UI design, and modern frontend libraries. Strong analytical thinker with experience in both web development and IoT-based projects. Always learning new technologies and improving development workflows.

## SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, React Router, Framer Motion, Chart.js, Swiper

Backend: Node.js, Express.js, MongoDB, REST APIs

Tools & Platforms: Git, GitHub, Vercel, Firebase, Netlify, VS Code, Figma

Other: IoT Projects, Particle Animations, UI/UX basics

Soft Skills: Problem Solving, Teamwork, Time Management, Adaptability, Communication

## PROJECTS

### Game Vault - Full-Stack Next.js Web App

[Live Demo](#) [Github Repo](#)

Tech: Next.js 15, Firebase Auth, MongoDB Atlas, Tailwind CSS

#### Key Features:

- Implemented Google login using Firebase Authentication.
- Built full CRUD operations for game collection.
- Integrated real-time games banner with MongoDB.
- Added animated hero section with gradients and particles.
- Responsive UI with Swiper slider and custom animations.

### The Book Haven - MERN + Firebase Book Management App

[Live Demo](#) [Github Repo](#)

Tech: React.js, Firebase Auth, Express.js, MongoDB, Tailwind CSS

#### Key Features:

- Email/Password + Google authentication with Firebase.
- Built protected routes and user dashboard.
- Integrated full CRUD for book management.
- Added responsive UI with dark/light mode toggle.
- Created animated logo and hero section using Framer Motion.
- Live: [bookhaven-client.web.app](http://bookhaven-client.web.app).
- Code: [github.com/TheLunatic1/bookhaven-client](https://github.com/TheLunatic1/bookhaven-client).
