SALMAN TOHA

WEB DEVELOPER

PERSONAL PROFILE

A web developer with a strong interest in projects that require both conceptual and analytical thinking. Familiar with programming languages like C, C++, Python, Java, Javascript and designing and implementing scalable, high-performance web applications using Reactjs, Nextjx, MongoDB, Vercel, Simple ExpressJs, TailwindCSS, DaisyUI, and many other js/html/css based libraries. I'm always eager to learn from anyone and everyone. Experienced in IoT and AI-driven solutions.

SPECIALIZATIONS

- Full Stack Web Developer (Frontend Focused)
- Website design
I am an expert in Reactjs, Nextjx, MongoDB, Vercel, Simple Express, HTML, CSS, JavaScript, TailwindCSS, DaisyUI, and many other js/html/css based libraries.

OTHER SKILLS

I am self-motivated and extremely driven. I work well under pressure and can deliver reliable results. I am a team player and can thrive in a fast-paced environment. I often work on IoT projects, which are also connected to web development. I am excellent in English. I have 6.5 IELTS score.

Additionally, I am always eager to learn new technologies and expand my skill set. I have a strong problem-solving ability and can think critically to overcome challenges. My communication skills are top-notch, allowing me to collaborate effectively with team members and stakeholders. I am also adept at time management, ensuring that I meet deadlines without compromising on quality. Overall, I am passionate about technology and dedicated to contributing positively to any project I undertake.

RECENT PROJECTS

Game Vault

A stunning full-stack gaming collection app built with Next.js 15, Firebase Auth, MongoDB Atlas & Tailwind CSS
Live Demo: https://game-vault-client.vercel.app
Github Repo: https://github.com/TheLunatic1/game-vault.git

Key Features :
- Google Login with Firebase Authentication
- Add, Edit & Delete your favorite games
- Real-time latest games auto-sliding banner from MongoDB
- Beautiful responsive design
- Floating particle animations + smooth Swiper slider
- Full CRUD operations with MongoDB Atlas
- Deployed on Vercel with zero downtime
- Stunning hero section with gradient text & animations

The Book Haven

A modern full-stack book management web app where users can browse, add, edit, borrow, and manage books with a beautiful UI and smooth animations.
Live Demo: https://bookhaven-client.web.app
Github Repo: https://github.com/TheLunatic1/bookhaven-client.git

Key Features :
- User authentication (Email/Password + Google Sign-In) via Firebase
- Full CRUD operations (Add, Edit, Update Quantity, Delete) for books
- Protected routes – only logged-in users can manage their books
- My Books page – see all books added by you
- Sort books by rating
- Animated hero banner using Framer Motion
- Dynamic animated logo
- Toast notifications (React Hot Toast) & tooltips (React Tooltip)
- Fully responsive design (mobile + desktop)
- Dark/Light mode ready (via DaisyUI)
